

Say goodbye to bowing, curling, delaminating and fading with Synaps® polyester film.

Synaps® OM is a next generation synthetic print media made from high-grade polyester film, not vinyl. Polyester films have superior dimensional stability and unmatched lay-flat characteristics. The result: great looking prints that hold their shape and color without extra laminating or mounting. Synaps® OM withstands harsh environments inside or out.

Engineered to deliver outstanding image quality on a wide range of devices – from UV flatbed to latex printers to traditional screen printing – Synaps® OM delivers effortless, efficient processing combined with beauty and strength to create high impact, high margin, large format graphics.

Features

- Lays flat, stays flat – even after rolling
- Waterproof and weather resistant
- Superior alternative to lamination
- Dries and cures fast
